Lotus

design by Vincenzo Vinci & Alex Chai

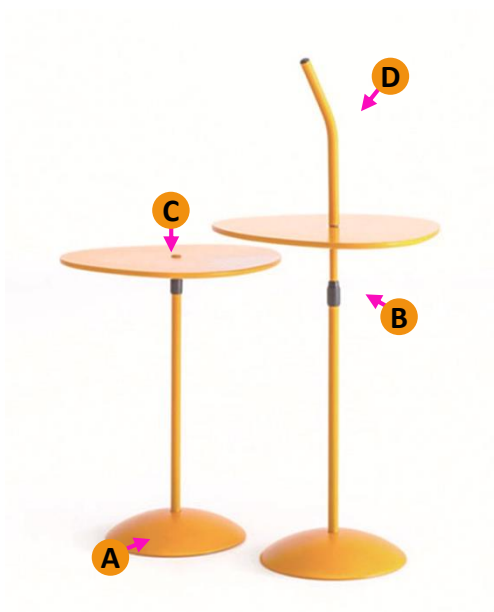

Created for relaxed, friendly moments, the Lotus Side Table is easy to plan into any type of environment. Used on its own or in pairs, the form of the table is inspired by the iconic shape of the lotus plant. The “carpel” of the lotus flower extends up and creates a handle making the table easy to move and invites the user to “Pick me up”.

A unique structure allows control of the height and the scratch resistant table surface uses eco-friendly technology to make Lotus more durable and more sensitive to its inspirational roots in nature.

Consisting of 4 elements, the Lotus is easily assembled in just a few simple steps.

The structure is metal with the top in mdf finished with anti-scratch electrostatic powder coating

LOTUS TABLE

A – Lacquered finish in Red, Green, Yellow and Light Grey

B – Height adjustable from low to laptop table height (45cm~74cm)

C – Removable carry handle

D – Carry handle for portability
