

height adjustable desking

height adjustable desking

Thinking Ergonomix manufactures a range of height adjustable desking that is designed to provide a solution for all work environments. Height adjustable desking provides the user with control of the desk height and the flexibility to suit individual requirements.

ALTITUDE™ and BODY LANGUAGE™ offer the choice of different leg and foot profiles. The BODY LANGUAGE™ foot has been specifically designed to allow a mobile pedestal unit to sit over the top of the foot creating additional sitting space for the user.

Perforated metal modesty panel

Mesh fabric modesty panel

Pin and hole adjustment detail

The sleek design of ALTITUDE™ and BODY LANGUAGE™ is complemented by items designed to provide personal comfort such as modesty panels.

BODY LANGUAGE™ foot detail

Slimline design allows mobile pedestal to roll over BODY LANGUAGE™ foot.

Optional electric operation is available with the slimline handle control unit

ALTIUDE™ foot

BODY LANGUAGE™ foot

ALTIUDE™ and BODY LANGUAGE™ can achieve a height adjustment range of 400mm from 610mm to 1010mm when using a 25mm thick worktop. The standard height adjustment operation is via an easy to use ergonomic handle with optional electric adjustment available. For manually operated desks the handle is discreetly housed under the desk surface in an unobtrusive position allowing the user to access the height adjustment with ease.
