

everything old is new again

**eona**

**everything old is new again (eona)** is a modular table system designed for flexibility of function allowing a range of configurations to accommodate a range of uses. Designed with the environment in mind, the development of **eona** ensures low environmental impact through the life of the product.

**eona** is manufactured from mostly post consumer recycled materials. **eona** uses 100% post consumer recycled aluminium for legs and leg support inserts, post consumer recycled steel for outer leg supports, rails and adjustable glides, and recyclable polypropylene.

**eona** is available with a wide range of table tops made from environmentally preferable materials with options including timber sourced from responsibly managed forests and low formaldehyde emission melamine panels.

**eona** has been designed for 100% disassembly, ready for recycling at the end of its useful life. **eona** is carbon neutral with the greenhouse gases emitted from the manufacture of the table frame and the shipment through Australia and to the United Kingdom offset through a certified carbon offsetting program.

## environmental considerations

Sustainability is embedded throughout our company's culture with all members of the Thinking Ergonomix team playing a role in addressing environmental issues.

We constantly strive for continual improvement to reduce energy use, emissions, waste and to comply with or exceed any environmental legislation.
