

# LIBRARY SHELVING

## EXPERIENCE COUNTS

Brownbuilt has been an Australian industry pioneer since 1885 and has been responsible for many technical innovations in shelving systems during that time. Brownbuilt's position as Australia's leading supplier of shelving systems reflects a philosophy of continued investment in modern technology and use of the highest quality components.

## BETTER BY DESIGN

Brownbuilt Library Shelving is designed to provide efficient and economical freestanding library storage and display facilities. Versatile configurations and a wide range of storage accessories ensure layout flexibility and the maximum use of available space. Brownbuilt Library Shelving uprights are double-punched to allow for independent, adjacent shelf positions, with 20mm vertical height adjustment. A durable bolted frame assembly, utilising welded single or double sided upright construction, forms a stable storage unit. Adjustable feet in each upright compensate for uneven floor surfaces to provide additional operator safety. Brownbuilt Library Shelving can be easily extended, reconfigured or relocated to suit changing storage needs over time.

## POWDER COAT FINISH

Brownbuilt Library Shelving is available in a wide range of standard contemporary colours for integration into most storage environments and is painted using modern thermo-set powder coatings, which are more durable than baked enamel finishes.

## QUALITY AND SUPPORT

Brownbuilt's national network of experienced technical staff can assist with storage needs analysis to formulate individual innovative and practical storage solutions. Brownbuilt has a total commitment to quality with all products manufactured to a quality system based on Australian Standard AS/NZS ISO 9002:1994.
