

ALTITUDE™

height adjustable desking

ALTIUDE™

height adjustable desking

ALTITUDE™, manufactured by Thinking Ergonomix, represents a new phase in height adjustable desking systems. Designed to provide a solution for all work environments, ALTITUDE™ is a stylish and simple product that can be used with ease.

Accommodating all workplace applications, ALTITUDE™ has been designed to recognise the users needs while creating an aesthetic addition to the workplace.

Available with Focus monitor arm

Perforated metal modesty panel

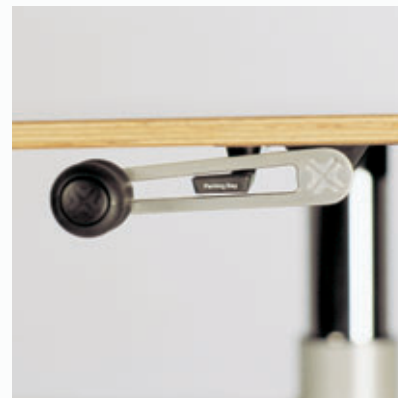

Mesh fabric modesty panel

The sleek design of ALTITUDE™ is complemented by items designed to provide personal comfort such as modesty panels and the handle resting bay. For manual operating desks, the handle is discreetly housed under the desk surface in an unobtrusive position allowing the user to access the height adjustment with ease.

Optional electric operation is available with the slimline handle control unit

Handle detail with parking bay for resting handle when not in use

ALTITUDE™ can achieve a height adjustment range of 400mm, from 610mm to 1010mm when using a 25mm thick work top. The standard height adjustment operation is via an easy to use ergonomic handle with optional electric adjustment available.

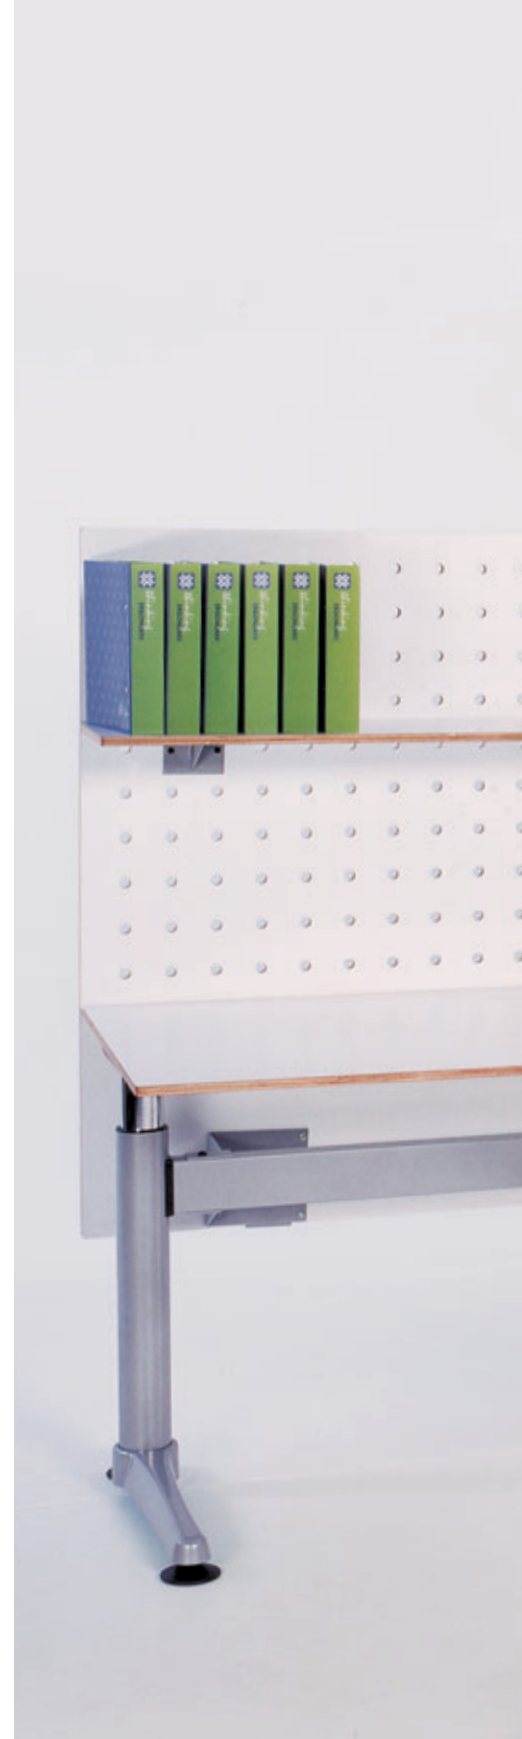

Fixed height leg

Incremental height leg

Pin and hole adjustment detail
