

Executive Seating

Motion & Webb Series

Motion 2 - High Back Executive

Motion 5 - Low Back Management

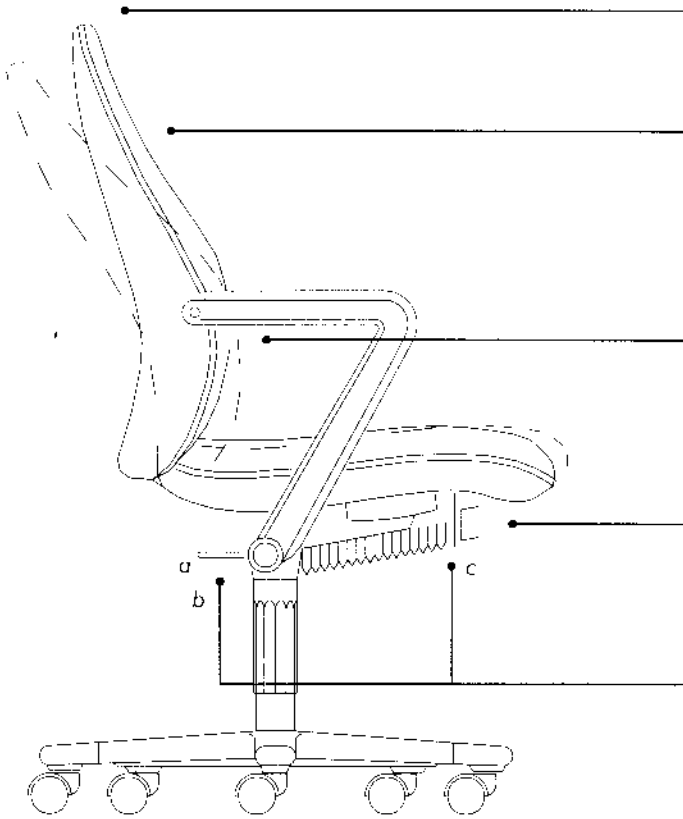

A clean sophisticated design, supportive comfort and unique synchronised movement define the Motion and Webb Series. The proven Motion design has been extended across a series of 9 chairs to accommodate executive, management, task and conference applications.

Motion chair components are finished in either black powder coat or polished aluminium. Cantilever chairs are available in black powder coat or chrome. All swivel chairs have moulded arm pads, and the option of contrasting upholstery piping is available on request. This chair design lends itself to the magnificent comfort and durability of natural leather.

Webb 2 - Executive

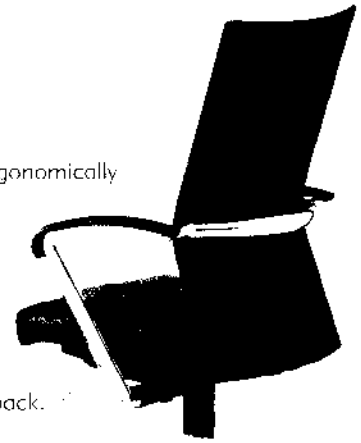

Technical SPECIFICATIONS

Back support

Motion's seat and back are ergonomically shaped for superior comfort.

The Webb chair's unique back support method uses specially developed elastic webbing interwoven over a steel frame, which conforms perfectly to every individual's back.

Special hinged seat pan and back support

Suspended in a fixed framework, the special hinged seat allows the chair to maintain a constant centre of gravity across a range of seated positions, giving a superior sense of stability.

Unique passive tension mechanism

Allows the back and seat to move with the body, unlike conventional seating which resists the body's movement.

Easily operated adjustment

- a. Tilt lock lever (LHS)
- b. Height adjustment lever (RHS)
- c. Tilt tension adjustment

Visitors Chairs

Motion 3A and 5A chairs are available as fixed height variants of Executive chairs, on castors.

Task Chair

The task chair has a synchronised seat action with height adjustable arms. Components are charcoal grey.

Two arm options

Shorter operational arms are convenient for close desk work.

Finish options

Motion chairs may be ordered with all black components.

The Motion and Webb chairs were designed in Germany by Burkhard Vogtherr and is manufactured in Australia by Workspace Commercial Furniture Pty. Ltd. under licence to Davis Furniture Industries Inc. USA
