

VISION

deluxe table systems

EXO

EXO series

EXO series

EXO is a segmented table base system specifically designed and engineered to produce a large variety of table bases for commercial executive environments.

Nine of the twelve EXO elements are Pressure Die Cast recycled aluminium, with the columns, rails and the large cross top, being milled from steel.

To compliment the bringing together of the precision engineered aluminium and steel elements, each table base is locked together with high tensile 'Brako' bolts,

Our segmented table base system offers

- Elegant design.
- Sound, precision engineered components.
- We contribute towards reducing the consumption of resources and the effect on the environment by selecting quality materials with a long service life. Wherever possible, renewable and recyclable materials are used in all our products. Packaging materials of furniture and components are kept to a minimum and are reused as often as possible.
- Aluminium components and all metal parts are recyclable.
- Stable and safe table base configurations to suit an endless variety of table sizes.
- 5 year warranty.
